

Calculate Linux - Bug # 103: ebuild calculate-sources hung after complete genkernel

Status:	Closed	Priority:	Urgent
Author:	Mikhail Hiretsky	Category:	
Created:	01/29/2010	Assignee:	Mikhail Hiretsky
Updated:	02/01/2010	Due date:	
Subject:	ebuild calculate-sources hung after complete genkernel		
Description:	Merging of calculate-sources-2.6.32.6 with USE="vmlinuz" hungs after string <pre>Make sure you have the latest genkernel before reporting bugs.</pre>		

History

01/29/2010 02:28 pm - Mikhail Hiretsky

- File genkernel-1.patch added

This patch disable clean procedure after build of kernel. For using this, try:

```
<pre>
cd /usr/bin
patch -p1 <D,Đ¼Ñ•_ĐđĐ°Ñ,Ñ‡Đ°
emerge calculate-sources
</pre>
```

Perform for disable patch:

```
<pre>
cd /usr/bin
patch -R -p1 <D,Đ¼Ñ•_ĐđĐ°Ñ,Ñ‡Đ°
</pre>
```

I am waiting for result.

Or you should kill this process:

```
<pre>
12900  root                39      19   17488      952      776  R   100.      0.1    4:59.99  rm   -rf
/var/calculate/tmp/portage/sys-kernel/calculate-sources-2.6.32.6/work/linux-2.6.32.6-calculate/temp/28679.5557.13226.10655
</pre>
It looks silly, but the directory exists. 8-O
```

01/29/2010 03:37 pm - Mikhail Hiretsky

No necessity to delete this directory, because after merging it will be removed. Result of patch work show: problem in it or not. I don't know why 'rm' could not finish process of removing temporary directory. I tested this ebuild on about ten computers and "rm" didn't hang emerge process.

01/29/2010 04:40 pm - Mikhail Hiretsky

Necessity changes add to calckernel-3.4.10.903-r20, before installing calculate-sources, please update calculate overlay and install last calckernel.

```
<pre>
layman -s calculate
emerge calckernel
emerge calculate-sources
</pre>
```
