Ð¢ÐµÐ¼Ð°:	calculate-sources-4.14.14: ./sync-check.sh: Permission denied
ÐžÐ¿Ð¸Ñ•Ð°Ð½Ð¸Ðµ:	This seems to be first stable linux version, released with sync-check.sh tool.

Problem appears during <pre>make modules_prepare</pre>, in postinst.

As seems for me, it tries to run non-executable script.

log below is from second run, after most part is done:
<pre>
LANG=C make modules_prepare
  CHK   include/config/kernel.release
  CHK   include/generated/uapi/linux/version.h
  CHK   include/generated/utsrelease.h
  CHK   include/generated/bounds.h
  CHK   include/generated/timeconst.h
  CHK   include/generated/asm-offsets.h
  CALL   scripts/checksyscalls.sh
  DESCEND objtool
make[2]: execvp: ./sync-check.sh: Permission denied
</pre>

Just found reported:

https://github.com/postmarketOS/pmbootstrap/issues/950

ÐŸÐ½, 19 Ñ„ÐµÐ²Ñ€. 2018, 14:58:41 +0300 - Mikhail Hiretsky

Try to compile calculate-sources-4.14.19.

ÐŸÐ½, 19 Ñ„ÐµÐ²Ñ€. 2018, 19:10:49 +0300 - Nikita Zlobin

Already have 4.14.15 - doesn't have this bug.

Ð’Ñ‚, 20 Ñ„ÐµÐ²Ñ€. 2018, 05:27:17 +0300 - Alexander Tratsevskiy
