Subject:	git-annex does not build - broken deps.		
Description:	Hi,		

Hi,

I've tracked down the problem and the dependency dev-haskell/http-conduit-2.2.3 failed to build in the config phase.

Here are the logs: http://pastebin.calculate-linux.org/en/show/63947

By the way, I've already run haskell-updater after emerge world without success.
Thanks for your help

Hi,

Now a binary package has been assembled, try it.
