You can set USE in /etc/portage/package.use/custom

```
<pre>
```

```
app-office/libreoffice-bin PYTHON_TARGETS: python3_5 PYTHON_SINGLE_TARGET: python3_5
```

```
</pre>
```

But in this case python-3.5 will be installed.

#### 09/20/2018 11:17 am - Maxim Ronzhin

please install app-office/libreoffice not app-office/libreoffice-bin.
