Subject:	app-arch/xz-utils ("app-arch/xz-utils" is blocking app-arch/lzma-utils-4.32.7)		
Description:	<p>now calculate-sources depends on the app-arch/xz-utils. imho too fine idea to use lzma-utils because lzma-utils conflict with xz-utils, but lzma-utils is often used. For this I made the following changes:</p> <pre><pre> DEPEND="vmlinuz? (>=sys-kernel/calckernel-3.4.10.903-r19 >=sys-apps/calculate-1.3.4 - app-arch/xz-utils + (app-arch/xz-utils app-arch/lzma-utils) sys-apps/v86d)"</pre></pre>		

History

- Category set to Calculate Overlay
- Status changed from New to Closed
- Assignee set to Mikhail Hiretsky
- Priority changed from Normal to Low
- Target version set to 10.4
- % Done changed from 0 to 100

Fixed for all calculate-sources. Update calculate overlay and try to install calculate-sources.

```
<pre>layman -s calculate
emerge calculate-sources
</pre>
```
