Subject:	Calculate 11.0		
Description:	I have downloaded Calculate 11.0 x86_64 and found that it will not boot up on the Live DVD on a Intel i5 system with 4 gig of ram, I get nothing on the monitor what so ever. I have tried everything on the boot up menu altered the graphic still it will not boot up the live DVD so that needs looking into Everything works fine on my quad core system I am reporting this from the live DVD it looks nice, I'd Like to know. Can you get 3D desktop graphics with it?

What is your graphics card? Try to download the latest Stage. Some problems with the intel and nvidia fixed.
