<b>Subject:</b>	add parameters UID_MIN etc. for tuning cl-useradd		
<b>Description:</b>	<p>I think, it would be nice to add the ability to customize the config CDS parameters such as UID_MIN, GID_MIN, I think not prevent such as UID_MAX, GID_MAX that the local nick not overlap with users from a directory</p> <p>When done, add an entry in howto installation and moving to the CDS about these parameters, so as not to overlap with the /etc/login.defs, for example</p> <pre># grep -E '^[G]UID_M(IN AX)' /etc/login.defs UID_MIN 1000 UID_MAX 1999 GID_MIN 1000 GID_MAX 1999  # grep -E '^[G]UID_M(IN AX)' /etc/calculate/calculate.env UID_MIN = 2000 UID_MAX = 10000 GID_MIN = 2000 GID_MAX = 10000</pre>
