Subject:	add parameters UID_MIN etc. for tuning cl-useradd		

Description:	I think, it would be nice to add the ability to customize the config CDS parameters such as UID_MIN, GID_MIN, I think not prevent such as UID_MAX, GID_MAX that the local nick not overlap with users from a directory
	
	When done, add an entry in howto installation and moving to the CDS about these parameters, so as not to overlap with the /etc/login.defs, for example
	
	# grep -E '^[GU]ID_M(IN|AX)' /etc/login.defs
	UID_MIN 1000
	UID_MAX 1999
	GID_MIN 1000
	GID_MAX 1999
	
	# grep -E '^[GU]ID_M(IN|AX)' /etc/calculate/calculate.env
	UID_MIN = 2000
	UID_MAX = 10000
	GID_MIN = 2000
	GID_MAX = 10000
