Subject:	grub cannot be installed in a partition , only on MBR		
Description:	Hello,		

When I installed Calculate I cannot install grub on a partition.

The installer gives only the choice of a disk.

And when I try the install from prompt with --mbr=/dev/sdc2 I see a message that disk /dev/sdc2 cannot be found.

- Category set to Calculate Utilities

- Status changed from New to In Progress

- Priority changed from High to Normal

Could you try run command

<pre>

parted /dev/sdc print

</pre>

and post the result here?

08/15/2011 03:59 pm - roelof wobben

parted /dev/sdc print gives this output :

arning: GNU Parted has detected libreiserfs interface version mismatch. Found 1-1, required 0. ReiserFS support will be disabled.

Model: ATA Maxtor 6Y060L0 (scsi)

Disk /dev/sdc: 61.5GB

Sector size (logical/physical): 512B/512B

Partition Table: msdos

Number Start End   Size   Type   File system   Flags
1   32.3kB 2155MB 2155MB primary linux-swap(v1)
2   2155MB 61.5GB 59.3GB primary reiserfs

Can you try to install Calculate on ext4 partition? May be the case in this bug - "libreiserfs interface version mismatch".

08/15/2011 04:19 pm - Dmitry Fomenko

- Tracker changed from Bug to Feature

08/15/2011 04:22 pm - Dmitry Fomenko

At the moment installer can install grub only in mbr or install nothing (with --mbr=off). Feature request: need ability to install the grub at the arbitrary partition.
