ofcourse, but it would be more helpfully if i can search in a list.
an example:

alex founder,iso-building,... irc-nick/email/whatever speak ru,eng,$language
elena translation, public relation irc-nick/email/whatever speak ru,fr
alfredo user-support irc-nick/email/whatever speak it,eng

so i dont have to search or puzzle if i have a question about iso-building or translations. ok someone will say: but you just can ask in irc or write an email tosupport@calculate.ru but i think its not always helpfully.

Thanks, the new version of the site we will add such support. We plan to start the development of a new site after the release of Calculate Linux 14.
