Which version of htop are you seeing this with?
The only thing I can see that htop-1.0.3 installs that is even remotely close is:
<pre>/usr/share/applications/htop.desktop
This is also true of the package for 1.0.3:
drwxr-xr-x root/root 0 2015-01-09 07:52 ./usr/share/
drwxr-xr-x root/root 0 2015-01-09 07:52 ./usr/share/applications/
-rw-r--r-- root/root 177 2015-01-09 07:52 ./usr/share/applications/htop.desktop
drwxr-xr-x root/root 0 2015-01-09 07:52 ./usr/share/doc/
</pre>

Ð°Ñ, 07 Ð°ÐžÑ€. 2015, 20:02:44 +0300 - fulvio ciriaco

Hello,
I cannot check, since I erased that installation,
by memory, it was the binary package installed with the kde profile use case.
I noticed it because of the conflict, but also checked it by means of equery.

Fulvio
