Could you please provide us with a command you use. Also please try to run the original command with UTF-8 as a locale and update the ticket with results.

Also it would be helpful run the following commands and inspect the results:

```
# host git.calculate.ru
# nmap -p 80,443,9418 -sT git.calculate.ru
```

In case the last command shows 9418 port as 'open' please try the next command:

```
$ telnet git.calculate.ru 9418
```

And provide us with any feedback you consider may be useful.

```
I use the command: cl-update --sync-only
calculate ~ # cl-update --sync-only
