Could you please provide us with a command you use. Also please try to run the original command with UTF-8 as a locale and update the ticket with results.

Also it would be helpful run the following commands and inspect the results:

```
# host git.calculate.ru  
# nmap -p 80,443,9418 -sT git.calculate.ru
```

In case the last command shows 9418 port as 'open' please try the next command:

```
$ telnet git.calculate.ru 9418
```

And provide us with any feedback you consider may be useful.

And yet, my friend tried to ping git.calculate.ru from another provider. To no avail. I can not specify its providers, but it is also Ukraine.

Please note capital 'P', while you used a small one. So you should use 'nmap -p 80,443,9418 -sT git.calculate.ru -Pn'. You can see an explanation of the options with 'man nmap'.

Anyway it seems like some issue on the route to the host. Could you please provide me with result of the following command:

\$ mtr -rn git.calculate.ru
