<b>Subject:</b>	Apache2 : error while loading shared libraries : libdb-4.8.so		
<b>Description:</b>	<p>Hi team Calculate,</p> <p>I installed in my company CSS, and after installing apache2, it can't start : error while loading shared libraries : libdb-4.8.so</p> <p>sys-libs/db installed but, version 6.0 and not 4.8 branch.</p> <p>To solve my problem, i emerged manually sys-libs/db:4.8</p> <p>I think there are a problem with the ebuild.</p>

Are You install binary or source package? If binary then try to

<pre>

```
FEATURES='-getbinpkg' emerge -1 www-servers/apache
```

</pre>

Same thing.

I am not at work, so, i test it on my CSS VM :
