| Subject:     | Feature request: cl-core-variables-show --csv (display output as CSV rather than pretty-print)   |           |                     |
| Description: | Maybe there is already a feature that meets this need, but I'd wish that there was a way to get non-pretty-printed output from cl-core-variables-show so that the output could easily be processed by another program or script. |           |                     |
