Subject:	USE flag problem with redshift		
Description:	<p>Hi team Calculate,</p> <p>We have a problem with redshift. On KDE (CLD) all is OK. But on CLDX, the app can't start because it doesn't detect GPS location. If I add the *geoclue* USE to install redshift, the software start and all is okay. Can you add the *geoclue* USE to redshift package ?</p> <p>Thanks !</p>

I see it solved.

Thanks
