Subject:	CLDX File previews, photos and videos, incomplete.		
Description:	<p>Hello,</p> <p>Following exchanges on the forum: <a href="http://www.calculate-linux.org/boards/2/topics/32338">http://www.calculate-linux.org/boards/2/topics/32338</a></p> <p>I open this "ticket" for bug :)</p> <p>Tumbler and ffmpegthumbnailer, present and correctly configured. Option "show thumbnails" "local files only" is selected in the preferences of Thunar.</p> <p>Unfortunately, the file preview is done randomly.</p> <p>This is very annoying, especially for handling large images.</p> <p>I tried several solutions including: sudo rm -rf ~ / .thumbnails / sudo update-mime-database / usr / share / mime Without results.</p> <p>Thanks in advance</p> <p>Sébastien.</p>
