Subject:	More official releases !		
Description:	<p>Hi team Calculate,</p> <p>Today, the last version of CL is 15.17.</p> <p>For a rolling release, it's old.</p> <p>Is it possible to make more frequently some ISO with new updates, or spotlight "stages releases" ?</p> <p>I don't have enough place on my mirror to store all ISO stages because there are too different dates.</p> <p>What do you think ?</p>		

History

Hi Adrien,

KDE updates come out too often :) However, during the upgrade you are installing just the latest version of the software, as opposed to a multi-stage upgrade Windows or Android.

Release tested well enough, but nightly builds would be preferable because contain all available updates.

The next release is scheduled for December.

OK

I stored nightly builds on my second mirror :-)
