<b>Subject:</b>	Possibility to edit the number of jobs		
<b>Description:</b>	<p>Hi Team Calculate,</p> <p>By default, emerge installs packages 4 by 4 and it's slower than 1 by 1 when we use a HDD 5400tr/mn. On SSD, no problems.</p> <p>Do you think it's possible to add an option in the Calculate console, to edit manually the number of jobs without edit the config file ?</p> <p>Thanks !</p>

You can set --jobs in @/etc/portage/make.conf/custom@. This file was modified once (installation).
